DETAILED ACTION

Information Disclosure Statement

1. The listing of references in the Search Report is not considered to be an information disclosure statement (IDS) complying with 37 CFR 1.98. 37 CFR 1.98(a)(2) requires a legible copy of: (1) each foreign patent; (2) each publication or that portion which caused it to be listed; (3) for each cited pending U.S. application, the application specification including claims, and any drawing of the application, or that portion of the application which caused it to be listed including any claims directed to that portion, unless the cited pending U.S. application is stored in the Image File Wrapper (IFW) system; and (4) all other information, or that portion which caused it to be listed. In addition, each IDS must include a list of all patents, publications, applications, or other information submitted for consideration by the Office (see 37 CFR 1.98(a)(1) and (b)), and MPEP § 609.04(a), subsection I. states, "the list ... must be submitted on a separate paper." Therefore, the references cited in the Search Report have not been considered. Applicant is advised that the date of submission of any item of information or any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the IDS, including all "statement" requirements of 37 CFR 1.97(e). See MPEP § 609.05(a).

Claim Objections

2. Claim 18 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Instant claim 18 is

Art Unit: 1797

improperly linked to a claim 19. For the purpose of examination on the merits, “claim 19” is replaced with –claim 1—.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3, 5-9, and 11-16 rejected under 35 U.S.C. 102(b) as being clearly anticipated by Bergami ‘852 (WO 01/43852). Bergami ‘852 teaches each limitation essentially as recited for claims 1-3, 5-9, and 11-16. See page 3, lines 24-31; page 4; page 5, lines 1-8; page 7; page 8, lines 23-32; page 9, lines 1-2; fig.1; abstract.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bergami ‘852. Bergami ‘852 teaches each of the limitations recited in independent claim

1. The shape and/or configuration of the tubular body where it is narrowed toward inside the air filter device and the shape of the tubular case as an elliptic or oval section is a matter of choice which a person of ordinary skill in the art would have found obvious

Art Unit: 1797

absent persuasive evidence that the particular configuration of the device was significant.

See MPEP 2144.04.

Claims 17 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bergami '852 as applied to claim 1 above, and further in view of Dudrey '949 (US Patent 5,669,949). Bergami '852 teaches the limitations recited in claim 1 but does not teach a spacer mean that matches the inside wall of the tubular case. Dudrey '949 teaches an air filtration arrangement with spacers (12), see fig. 1; col. 9, lines 5-8. It would have been *prima facie* obvious to one of ordinary skill in the art at the time the invention was made to include the spacers of Dudrey '949 for the purpose of maintaining the filter in a desired position within the housing. One skilled in the art would have been motivated to generate the claimed invention with a reasonable expectation of success.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and is listed on PTO-892 (Notice of References Cited). The references are considered to be of interest, as the references relate to the art of air filtration.

Double Patenting

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164

Art Unit: 1797

USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

8. Claims 1, 12, 15, and 16 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim claims 1, 2, 4, 12, 13, and 14 of U. S. Patent No. 6,638,330. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of U. S. Patent No. 6,638,330 are for an air filtering device with the same features and limitations of the current application. In addition, the filter cartridge (2) and filter element (2) have been used interchangeable in U. S. Patent No. 6,638,330.
